

End Conclusion CORVID 19 Virus Table Iran:

My Allah (All 1 alpha) informed me that the meaning of wearing burqa during bacterial, bacterial phage & virus pandemic is the insurance to fore come infecting further future.

In Iran this commandment of Allah Uakbar is not obeyed, because it is change to only a head textile what can be better used as mouth cap but in Afghanistan where only the female population ($\pm 50\%$) has a burqa commandment and the rest use mouth cap it leaded not to group immunity while in the Netherlands the cabinet declared group immunity for the Dutch population after more than 96% of her population where needed in with CORVID 19 Antigen alpha (the medicine what's reduced infection further future) revolved into group immunity. So it is than the need for countries who can not realize group immunity with CORVID 19 Antigen alpha to activate a period of duty to play all contact wearing burqa till group immunity has been tabled by national healthcare. It is the reality in Iran that all most all woman call the commandment to where head textile in public: "woman under puling," but the death number inside Iran coursed by CORVID 19 infection in column male is higher than column female so I am forced by Allah Uakbar to inform everybody that is official male under puling while Allah Uakbar was and bi me is so clear that it was not mend as female under puling and not mend as male under puling but Burqa duty during pandemic is mend as Bacterial, Bacterial Phage and Virus under puling.

Sincerely I stay in status of world doctrine,

Sir [Marcel Alexander Roelfszema](#).
